**Document** CSMS Requirements Spec (304-CD-003-001)

<b>RID ID</b>	<b>PDR</b>	200
<b>Review</b>	CSMS	
<b>Originator Ref</b>		
<b>Priority</b>	2	

**Section** 6.2.5.2

**Page** 6-20

**Figure Table** NA

**Category Name** Requirements

**Actionee** HAIS

**Sub Category**

**Subject** Event Logger Service Requirements

## **Description of Problem or Suggestion:**

C-CSS-28000 - Logger Service should support logging to multiple files both for greater reliability (redundancy and/or disk full errors) and for better scalability (possibly allowing log files by event type).

C-CSS-28030 - Messages can be stored and transmitted more efficiently by a message ID plus arguments rather than a C printf format. Message catalogs can be used to convert to text. This also allows for easier message text revision and for internationalization.

C-CSS-28080 - This requirement should be modified to say that the service will record any relevant environment information. Depending upon event type OS and DCE cell information may not be vital whereas other data not specified here is.

## **Originator's Recommendation**

Consider and revise requirements if deemed appropriate.

## **GSFC Response by:**

## **GSFC Response Date**

**HAIS Response by:** Forman

**HAIS Schedule** 2/28/95

**HAIS R. E.** E. Winston

**HAIS Response Date** 3/6/95

CSS agrees:

C-CSS-28000 is corrected.

C-CSS-28030 is a design issue and will be considered during detailed design.

C-CSS-28080 is corrected.
